Docenti / Instructors	Prof. Francesco Pierangeli
Risultati di	By the end of the course, the student will be able to understand the main topics in International
apprendimento	Economics.
specifici /	In particular, the student will have acquired an in-depth knowledge of the role of the credit market,
Expected Learning	technological progress, trade and inequality. The economics of the environment will also be covered as
Outcomes	climate change is one of the most pressing issues faced by society today. Finally, the student will
	develop
	an understanding of how institutions influence economic behaviour and the role of economic
	policymaking
	at both national and international level.
	The student will recognize the reasons for and the consequences of government intervention in
	markets
	identifying the key macroeconomic variables. Finally, the student will critically understand the
	mechanics
	behind monetary and fiscal policy. The student will acquire the skills to identify and communicate effectively the key issues affecting the
	global economy such as climate change, international financial crisis and the economic disparity
	between
	rich and poor nations. This is done through group work and presentations.
Programma / Course	The first part of the course focuses on fiscal and monetary policy through the analysis of the labour and
Syllabus	credit markets. This includes unemployment, economic fluctuations and asset market bubbles. The
-	great
	depression and the global financial crisis will also be covered.
	The second part is devoted to the analysis of living standards. This part includes global inequality and
	the
	economics of the environment.
	Finally, the third part studies the winners and losers from trade and specialization. In particular the role
	of
	technological progress and innovation in the networked economy.
	The module will cover the following topics:
	<ul> <li>Banks, money, and the credit market</li> <li>Rent-seeking, price-setting, and market dynamics</li> </ul>
	Unemployment and fiscal policy
	Inflation, unemployment, and monetary policy
	milduon, diompioymoni, did monotary policy

• The nation and the world economy             • Economics paties, and the world economy             • Economics of the environment             • Information, and the networked economy             • Economics, paties, and public policy             Tipologie di attività             didattiche previse is             relative modalità di             savogiment / Course is structured in 12 lessons of frontal teaching, for a total of 48 hours. The teaching method             the opportunity to present their individual assignment and group projects in class in the mid and             towards             the opportunity to present their individual assignment and group projects in class in the mid and             towards             the end of the course.             • Aragular students             The following is only valid for students who complete both individual and group assignments             successfully and will sit the exam in January and/or February 2022.             Individual Assignment: Enconnei Journal (% of final grade): 30%             In the first 4 weeks of the class, the student will need to pick a topic from "The Economist," which will             offer,             every week, new insights on the state of the world's economy. The student will have to track and             assess: tis evolution or ure the pariod of the weeks. The stopine is the most the timerary             of the storyline is described. This will expose students to current events which will have to be presented             coherently under the lens of ortical observation. the exam consisting of a written test, including open-ended questions and an oral test to assess the autonomy of judgment on the topics covered by the module.Criteri di misurazione dell'apprendimento e di attribuzione del voto finale / Assessment MethodsThe learning assessment involves the awarding of a final grade out of 30 <i>Regular students:</i> The final grades for the assignments and final exam are out of 30. The final grade is the weighted average of the grades of the individual and group assignments and the final exam. <i>Non-attending students</i> The grades for the written test and the oral test are out of 30. The final grade is the arithmetic average between the marks in the written and oral exams. However, the exam is passed only if a pass mark is achieved both in the written and oral tests. Consequently, only those who have achieved a pass mark in the written test may take the oral test.Propedeuticità/ prerequisitesThere are no prerequisites. However, in order to effectively attend the course, a good knowledge of methodological and conceptual fundamentals in Microeconomics and Macroeconomics is preferred.Materiale didatticoLearning materials
