LUM

GIUSEPPE
DEGENNARO

About us

The Founder

Our founder, **Giuseppe Degennaro** was born in 1940 in Bari.

He was an **entrepreneur and politician, elected to Parliament for four terms.**

Giuseppe Degennaro **founded LUM University in 1995, the first private university in southern Italy** entirely dedicated to economic studies and legal studies with the aim of preparing the future ruling class of our country.

His vision is our challenge today.

Our vision

The LUM educational model focuses on a **connection between continuous and applied knowledge through constant interaction with national and international companies and institutions.**

LUM acts as a pivot for scientific knowledge, through the **realization of studies and research within the departmental structures observatories, scientific laboratories and spin-offs.**

Our mission

Our mission is to contribute to the growth of society through education, innovation and research.

Teaching staff divided between academics and professionals

Business networking

Career opportunities

Tutoring for students

Direct relationships between staff, lecturers and students

Degree programs in English

Italian language programmes for foreign students

Project-based know-how

Continuously updated and learning programmes

Funding and scholarships

The training model

Our educational model places the **student at the centre of the academic experience**, adapts to their needs and encourages the development of their potential.

During lessons, **lecturers promote debate and discussion** through the analysis of theoretical models, close teacher/student discussion and practical application.

LUM is a University strongly oriented towards the world of work.

Engineers, Doctors, Managers and Jurists meet the students, stimulate them by discussing real cases to put them to the test.

Workshops and study tours project future graduates into working reality.

We also believe in the interaction between research innovation and teaching, stimulating in students new thinking and opportunities for confrontation with companies and institutions.

Where we are

Sports centre

Extended over **60 hectares**, comprising a **golf course** an **eighteen-hole golf course**, **two tennis courts**, a **restaurant** and an **outdoor swimming pool**.

New Campus

The **new campus** is organised with innovative and interactive spaces and extends over **11 floors for a total of 24,000 square metres**.

The aim is to open it up to exchanges of experience and to an educational world that demands more and more multimedia. Not only classrooms and laboratories, but also the creation of environments designed for discussion and sharing.

The project involves maintaining the original design of the building by architect Aldo Rossi with structural elements that recall the traditions and culture of the area

Degrees in Economics

Economics and Business Organisation

**L-18
(3 year)**

- Management
- Business Administration
- Digital Economy and Marketing

Economics and Management

**LM-77
(2 years)**

- Administration, Finance and Controlling

LMG/01
(5 years)

PhDs

PhD in Economics and Management of Sustainability and Innovation (EMSI)

The PhD in Economics and Management of Sustainability and Innovation is a 3 year English taught international program, is designed for highly qualified and motivated students who wish to acquire research and analytical skills in business and management disciplines related to sustainability and innovation management. The course provides students with a solid methodological basis and the ability to design and implement research projects in economics and business disciplines, with particular attention to sustainability (e.g. social innovation, technological innovation, innovative business models).

PhD's Coordinator

Prof. Angeloantonio Russo

PhD in General Process Theory (GPT)

The PhD in General Process Theory is a three year program taught in Italian and offers a training course that is characterized by its interdisciplinary nature, aimed at investigating and studying the procedural institution in its multifaceted discipline in the various sectors of the Italian legal system.

This research path, therefore, will constantly start from an original cultural background as the result of that comparative unitary approach which constitutes the distinctive feature of this doctorate, together with the comparison with some foreign universities for the purpose of verifying and comparing the procedural system Italian with other foreign systems.

PhD's Coordinator

Prof. Roberto Martino

Research Structures

LUM Enterprise

Spin-off of the LUM University which aims to develop innovative products and services with high technological value for companies. It provides digital, innovative solutions, analyzing processes through research and focusing its attention on the growth of SMEs.

knowledge-hub.it

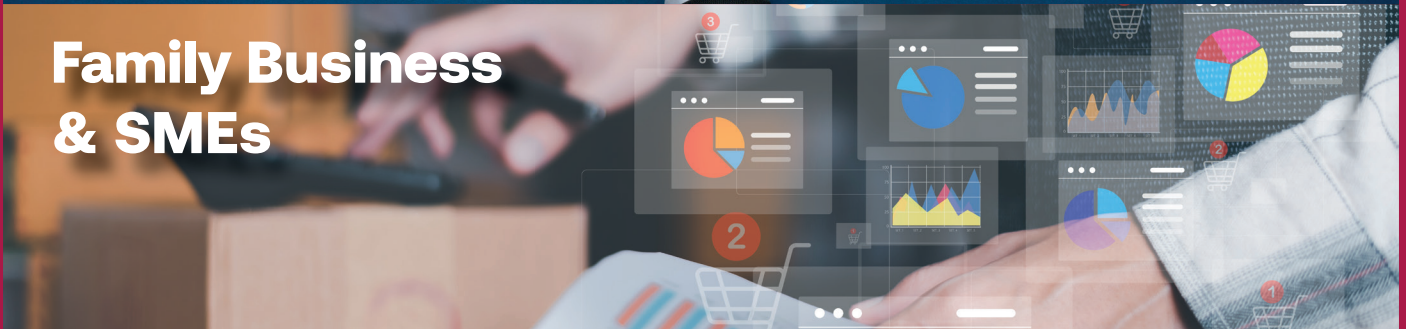

Observatories

Corporate Crisis

Family Business & SMEs

Sustainability and Finance

Marketing and Local Development

Lean Lab Laboratory

Digital

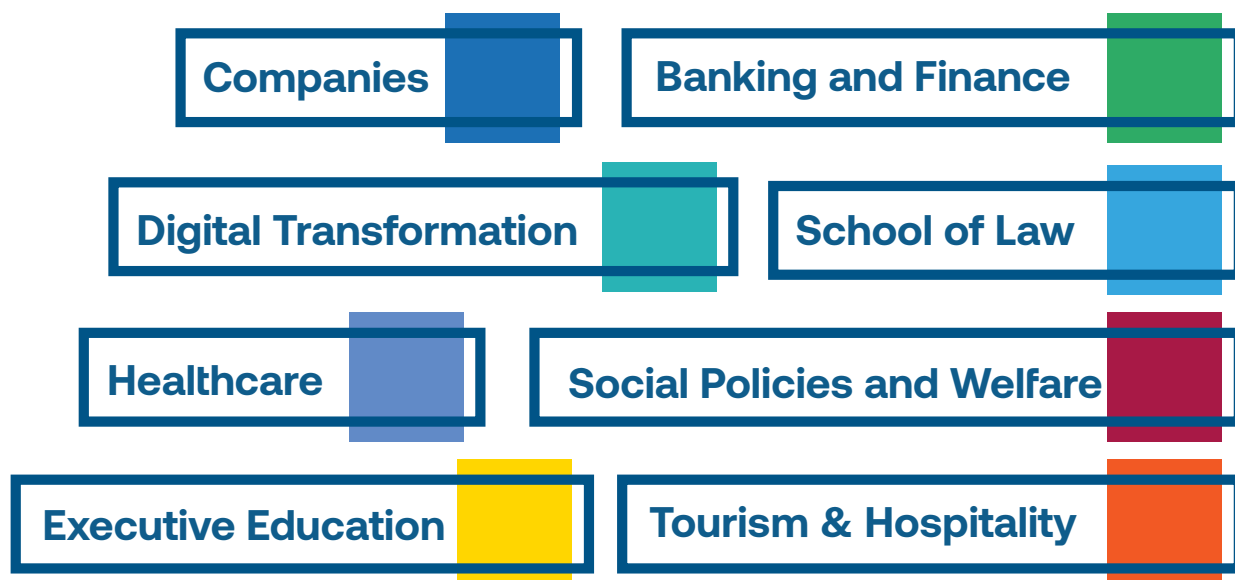

The LUM School of Management is the point of reference for post graduates.

In addition to the traditional Master's degree and Advanced Training and Specialisation courses, the School supports important activities of high scientific value: it promotes numerous seminar initiatives and important conferences, it establishes and realises 'Summer Schools', occasions for meetings and debates on corporate innovation processes, participates in the realisation of experimental and research initiatives with the main public and private territorial players.

In this development process, numerous fruitful relationships are gradually being consolidated with companies, public with enterprises, public institutions and healthcare companies, third sector organisations and with representative organisations, for which the School is a privileged interlocutor, aimed at offering skills and resources, to collaborate with the productive, institutional and cultural fabric.

Visiting

LUM has established a structured programme to invite visiting professors to spend one or two semesters on campus.

Visiting Professorships can also be arranged for shorter periods (the minimum period is of one month) and are awarded to interested candidates according to the Visiting Scientists guidelines available on the website.

Services

- Support from the faculty
- Airport Reception and Housing
- Orientation
- Support from administrative staff
- Health and well-being
- Sport and Leisure
- Clubs, societies and associations
- Campus safety
- Counselling
- Support for disabilities and learning disorders
